During the "RenaSup Challenge", an event that takes place twice a year, the project partners at RenaSup took the opportunity to organize a conference to present the project to the 44 participants. During the conference there were mainly teachers, but also school heads from different regions of France.

"Défi RenaSup" Conference

**Co-funded by the
Erasmus+ Programme
of the European Union**

The European Commission support for the production of this publication does not constitute an endorsement of the contents which reflects the views only of the authors, and the Commission cannot be held responsible for any use which may be made of the information contained therein.

Mr Petit, RenaSup's Executive Director, presented the project's various intellectual outputs and results. After the presentation, there was a time for possible questions, to discuss and debate on the subject of cultural and religious diversity in the school environment today.

In order to reach as many people as possible, one of our colleagues also had a stand with information on the project at the very heart of the event, where the students were. Thanks to this stand and the distribution of flyers, we have reached more students.

By adding the number of conference attendees and the number of people who stopped by the booth, we add up to a total of about 120 people, teachers, head teachers and students who were introduced to the project.
